Industrial Automation Training Centre

Empowering Tomorrow's Automation Experts

Accredited Siemens Training Partner

Our Siemens Certified Courses

TIA-MICRO

This course introduces the fundamentals of the SIMATIC S7-1200 automation system and SIMATIC STEP 7 Basic. Through practical exercises using a conveyor belt model, trainees gain hands-on experience and confidence in programming and commissioning tasks.

TIA-PRO1

This foundational course provides in-depth knowledge of the TIA Portal and SIMATIC S7-1500. Participants learn to configure hardware, write basic ladder/FBD code, and commission devices effectively.

TIA-PRO2

Building on PRO1, this course dives into advanced programming, troubleshooting, and diagnostics using SIMATIC S7-1500 and the TIA Portal. Ideal for professionals seeking deeper automation proficiency.

TIA-WCCM

Focused on HMI design with SIMATIC WinCC in the TIA Portal, this course covers graphic interface creation, alarm and trend handling, recipes, and system integration for operator control and monitoring.
